You study at the Ottawa campus as well as at the Canadian Aviation and Space Museum. Through a series of classroom-based courses and extensive practical labs, you acquire the skills specific to becoming ...

## **Aircraft Maintenance Technician - Ontario College Diploma ...**

An aircraft is a vehicle or machine that is able to fly by gaining support from the air. It counters the force of gravity by using either static lift or by using the dynamic lift of an airfoil, or in a few cases the downward thrust from jet engines. Common examples of aircraft include airplanes, helicopters, airships (including blimps), gliders, paramotors, and hot air balloons.

## **Aircraft - Wikipedia**

In June 2011 CASA introduced Part 66 of the Civil Aviation Safety Regulations (CASR) 1998, changing the training and assessment standards for licensing of aircraft maintenance engineers. It replaced Regulation 31 of the Civil Aviation Regulations 1988 (CAR 31). The system is based on the A, B1, B2 and C categories and type ratings, used by the European Union Aviation Safety Agency (EASA).

## **Becoming a Licensed Aircraft Maintenance Engineer (LAME ...**

Aerospace engineering is the primary field of engineering concerned with the development of aircraft and spacecraft. It has two major and overlapping branches: aeronautical engineering and astronautical engineering. Avionics engineering is similar, but deals with the electronics side of aerospace engineering. "Aeronautical engineering" was the original term for the field.
