Falconer and Mackay offer lucid and concise descriptions of the equations describing genetic and phenotypic change (and fortunately for me include only essential derivations). There is a clear emphasis on application to evolutionary studies, which gets me excited for application to my work in the near future. flag 2 likes · Like · see review

Introduction to Quantitative Genetics by D.S. Falconer

As described in Falconer and Mackay (1996), when computing the response to mass selection, substituting co-heritability for heritability gives the correlated response to mass selection. Theoretically, the coheritability of ES is between 0 and -0.1 when the genetic correlation between two environments is higher or equal to 0.67, the ...
