You can do this by providing a basking spot or warm area that goes up to 80 F at one end of the cage. Use a ceramic heat emitter, nocturnal heat light, or under tank heating pad to provide a temperature variant. Leopard frogs hibernate, so in the winter, they will slow down and may stop eating for about three months.

Gecko/ Leopard Geckos ...

The leopard is a carnivore that prefers medium-sized prey with a body mass ranging from 10-40 kg (22-88 lb). Prey species in this weight range tend to occur in dense habitat and to form small herds. Species that prefer open areas and developed significant anti-predator strategies are less preferred.
